

Be a **DOER!** Karawhiua

Brand Guide

Version 2 - 20 July 2021

Introduction

This document outlines the basic rules on how to use the brand identity

“Be a doer! Karawhiua.”

Background

Karawhiua is a national campaign that supports whānau, hapū, iwi and Māori communities to help prevent the spread of COVID-19 and supports the vaccine rollout in Aotearoa.

It is led by Te Puni Kōkiri (Ministry of Māori Development) co-delivered by Te Hiringa Hauora/Health Promotion Agency and supported by the Ministry of Health and the Unite-Against COVID-19 teams. It has been developed with the Iwi Communications Collective and other Māori communications specialists.

The kaupapa

The campaign encourages Māori to take action, actively inform themselves, and make a positive decision about vaccination to protect their whānau; hence the “Be a doer! Karawhiua” slogan. Karawhiua is an idiom that means give something everything you’ve got. Give it heaps! It can be used alongside other lines such as “Protect your whānau against COVID-19. Be a doer! Karawhiua”.

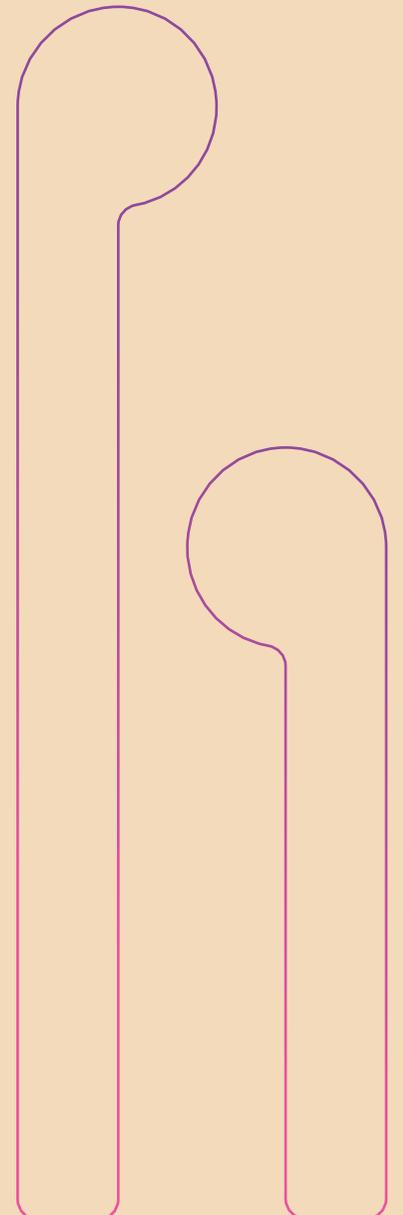

Karawhiua brand

The brand identity for "Be a doer! Karawhiua" is a system which contains a number of core elements – logos, brand colours and typography. All the elements come together to create a distinctive, contemporary Māori look and feel.

This document has been prepared to help all employees, partners and suppliers to comply with the brand requirements. The brand should be provided to Te Hiringa Hauora before publication to ensure brand integrity.

For more information you can contact the Karawhiua team at Te Hiringa Hauora.

1.0 Tohu matua

Our symbol (brandmark) represents a heart that reflects aroha (love for our community) and health.

There are elements within the design that reflects:

- whānau/iwi/hapū
- our Māori communities
- warmth
- positivity 'can do'
- whakapapa
- well-being
- rangatahi through to pakake
- trust
- support
- energy
- pro-activism
- health
- unity

The name (wordmark) contains elements taken from the symbol. There is movement within each letter to represent motivation and connectivity.

The strands through the letters represent harakeke fronds, acknowledging the relationships Māori have with the environment. Our goal is to encourage our people to come together again and weave a future where our vision is focused on protecting our people and our whakapapa.

Be a **DOER!**

KARAWHIUA

1.1 Tohu variants

Our tohu exists in six different configurations to be used across many different spaces.

The primary and secondary tohu can be used across all digital and print spaces.

Centre stacked logos should be used when horizontal space is limited.

Both symbols should never be less than:

- 8mm high in print
- 50 pixels high on screen.

Primary tohu

Primary left stack

Primary right stack

Primary centre stacked

Secondary tohu should be used for smaller scale applications for legibility

Secondary left stack

Secondary right stack

Secondary centre stacked

1.2 Clear space

To make sure our tohu stands out as it should, you need to make sure there is clear space on all sides. This space should be the height of the symbol **K**.

No type or graphics should encroach into this clear space area.

Primary tohu

Primary left stack

Primary right stack

Secondary tohu should be used for smaller scale applications for legibility

Secondary left stack

Secondary right stack

Secondary centre stacked

1.3 Tohu use

When applying our tohu to communication formats (eg. posters, presentations, brochures and advertising) it is important that we align the symbol to the edge of that format as shown here.

Our primary tohu is aligned left on the left edge of a format

Our primary tohu is aligned right to the right side of a format

Our secondary tohu is aligned left on the left edge of a format

Our secondary tohu is aligned right to the right side of a format

1.4 Tohu colour use

The coloured tohu is our primary tohu colourway, and it should only be used with white or light coloured backgrounds to maintain legibility of the tohu.

The black tohu should be used on light coloured backgrounds.

The white tohu should be used on dark coloured backgrounds.

Primary tohu

Secondary tohu

1.5 Incorrect tohu use

Avoid using the tohu in these ways.

Don't use the wordmark on its own and do not substitute with any other typeface.

Don't use colours that have not been specified.

Don't alter the arrangement or size of the elements.

Don't use our symbol on its own or attach it to words/messages.

Don't use the symbol on its own or crop it.

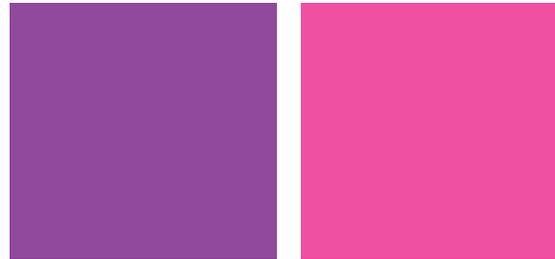

Don't place on a background too light or dark for its legibility.

2.0 Colour palette

Our colour palette represents layers within Te Tai Ao. It expresses the importance of whānau, rangatahi, hauora and whakakitenga as a basis in Te Ao Māori. It encourages the importance and awareness of vaccines within our Māori communities.

As well as our primary colours, a secondary supporting colour palette has been chosen. These colours can be used to support our primary colour palette when designing brand communications.

3.0 Icons

Icons/elements have been designed to compliment design aesthetics. This can bring more life to the application.

When considering the positing of dividers/icons/logos/design elements avoid placing design elements over imagery.

4.0 Primary typeface

Omnes is our primary typeface. Not only does this typeface align with the COVID-19 government look and feel, it also offers a warm rounded presence for our target audience.

Licence

This cloud typeface can be accessed through Adobe Type kit:
www.fonts.adobe.com/fonts/omnes

Minimum size

It is recommended that the minimum font size for Omnes be no less than 10pt due to readability issues.

Omnes is a typeface with a range of **weights**

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

1234567890

Omnes Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

1234567890

Omnes Medium

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

1234567890

Omnes Semi-Bold

4.1 Secondary typeface

Whenever 'Omnes' isn't available we have to rely on one of the system fonts pre-installed on both Windows PC and Apple Macintosh: Our system typeface is Helvetica. It is available on every machine and therefore ensures 100% compatibility across emails, Microsoft Word documents and invoices.

Helvetica

Use **Helvetica** for internal documents - emails, typed letters in Microsoft Word, invoices etc.

5.0 Co-branding

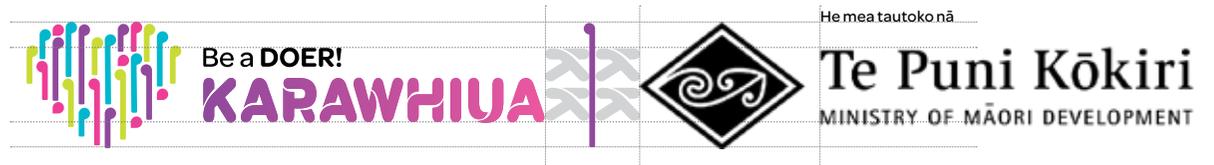

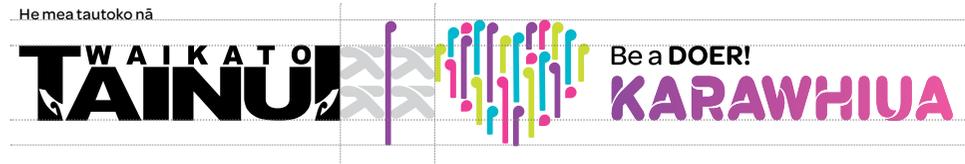

Endorsed brands have their own brand attributes, including a name, brandmark, brand promise, position and personality.

Our masterbrand plays a supportive and linking role providing assurance to our target audiences. This can be expressed in the form of a descriptor eg. Supported by..., Powered by...

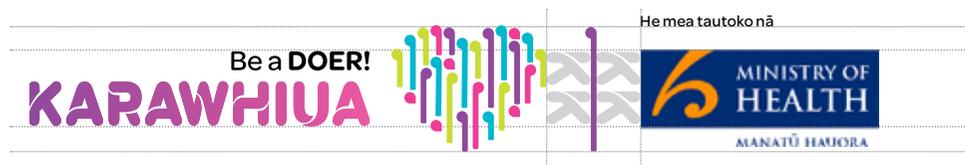

The koru divider always faces towards our tohu to show other brands endorsing and supporting our kaupapa.

Lock-up arrangement and spacing

Left/centre aligned lock-ups where our tohu has more status according to the kaupapa

Right/centre aligned lock-ups where our tohu has more status according to the kaupapa

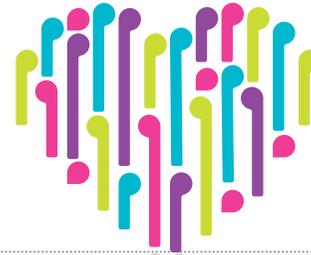

5.1 Iwi co-branding

The centre aligned lock-up should only be used where our tohu supports iwi and hapū, and should be arranged and spaced as follows

The space between the tohu symbol and the iwi is measured by using half the height of the symbol **K** from the word mark as seen in the samples.

Lock-up arrangement and spacing

Centre aligned lock-ups where our tohu supports iwi and hapū
